

SENSING SOLUTIONS FOR AUTOMATION

Make Ordering Easy, One Step at a Time!

Miller Edge is pleased to announce the immediate availability of our latest ordering tool – the Sensing Edge Field Worksheet. The Field Worksheet is a single sheet that walks you through the process of selecting the right edge for your application. The Field Worksheet does not require a user to know any of our product models, allowing dealers to select products based on the types of doors and openings that are being used in the application.

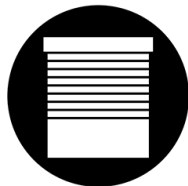

The Quick Reference Guide is easy to print, and developed to keep on your trucks for filling out in the field. A copy of the Quick Reference Guide for doors is included with this announcement and can also be downloaded from our [website](#).

What About Gates?

We are currently in the process of developing a worksheet for gate applications! Each worksheet will be designated with a Gate or Door symbol (see below). Keep an eye out for a future email containing the Sensing Edge Field Worksheet for Gates.
