

SENSING SOLUTIONS FOR AUTOMATION

Introducing a Product that will SWEEP the Nation!

Miller Edge has taken the operation of the ME120 Sensing Edge to a new level. By pairing the ME120 sensing edge with the new ME120-C5 aluminum mounting channel, a sweep edge is formed on the bottom of swing gates. This design is to safeguard the entrapment zone on driveways and curbs along the path of travel.

The ME120-C5 channel is installed on a 45° angle, which is specially designed to detect any presence when trapped between a curb and a swinging gate. This channel is easy to install and ANSI/UL 325 Recognized Component

Click below for the updated pricing addendum. Literature for the ME120 is also available on our website. For any questions regarding the ME120-C5, or to receive updated price pages and literature, please feel free to contact your Miller Edge Sales Representative.
