SENSING SOLUTIONS FOR AUTOMATION

Introducing the New MG110 Gate Safety Edge

Miller Edge Inc. is pleased to announce the immediate availability of our newest safety edge – the MG110! Specifically designed for draw-in posts on gates, the MG110 ensures your gate installations operate safely and meet the latest UL325 requirements. The MG110 is intended to serve gate dealers as an affordable, easy to install method of protecting the draw-in post on gates – the area on gates where the most serious injuries tend to occur

The MG110 is sold in kits, featuring all the necessary components for installation, including End Caps, Hardware, and Mounting Channel. Tested and rated to perform at optimum levels up to -40° the MG110 is ruggedly durable and able to stand the test of time. The strength and rigidity of the MG110's custom molded End Caps keep the edge in place, and provide a clean, finished look to the edge.

Click below for the updated pricing addendum. Literature for the MG110 is also available on our website. For any questions regarding the MG110, or to receive updated price pages and literature, please feel free to contact your Miller Edge Sales Representative.
