

Earn Learning Units and receive valuable information about safeguarding motorized commercial / industrial doors and applicable UL standards by participating in an American Institute of Architects Continuing Education Systems course.

As a registered program provider with the American Institute of Architects Continuing Education System, Miller Edge offers a FREE Lunch & Learn educational program offering you the ability to gain valuable knowledge while earning One (1) learning unit credit towards AIA membership and possible state architectural license Mandatory Continuing Education credits.

Sensing Solutions for Motorized Commercial/Industrial Doors

During this 1-hour information packed session you will learn how to:

- **Recognize the need for entrapment protection**
- **Determine the sensing solution that will be best suited to your project**
- **Specify sensing solutions to assure compliance with UL325**
- **Select a Door Installation subcontractor**
- **Understand the future of UL325 and Commercial/Industrial Door Safeguarding**

This course is intended to educate attendees about identifying safeguarding issues and specifying solutions for the following types of motorized doors:

Coiling/Rolling	Sectional
Sliding	Grilles
Airplane Hangar	Bi-Fold

Note: This course is not intended to assist with specifying safety solutions for pedestrian entrance doors.

For additional course information or to schedule a class at your firm, local AIA or CSI Chapter meeting, please contact Miller Edge.
